School's Brief History and Features			
Founded on April 1st, 1924, Chia Chi was initially established as a girls' school specializing in home economics. In response to the declining birth rate, Chia Chi made the transition to a co-educational institution in 2016. Currently, Chia Chi offers three programs: senior high, senior vocational, and a			

dance program as part of its talented education curriculum.

Chia Chi Senior High School comprises 30 classes in the senior high school program, including two experimental classes for each grade: **the Bilingual Experimental Class and the Math and Science Experimental Class**. Additionally, we have three classes in the **dance program** and 18 classes in the senior vocational school program, which includes two departments: **Fashion Design/Styling Design and Food and Beverage Management**.

Through the collective efforts of our dedicated teachers and students, Chia Chi has achieved outstanding academic and extracurricular performances. We take pride in the accomplishments of our students and believe that Chia Chi is steadily progressing towards a promising future.
